

# PowerWash™ Motors

*Dedicated People, Quality Products, and above all, Service*

The PowerWash XT washdown duty motor was specifically designed and developed to provide long dependable service in the most severe washdown applications. The motor incorporates full FDA approved gasketing, double sealed ball bearings, stainless steel shaft, nameplate, and hardware.

Each motor is designed and built to prevent the entrance of water, as well as resistance to corrosive effects from solvents and cleaning agents. Drain plugs in the frame and conduit box allow for all angle mounting and release of condensation from inside the motor. Extra epoxy protection for the motor's interior reduces the risk for rust and corrosion build up.

Our washdown duty motor line meets or exceeds NEMA and IEEE standards for motor performance. These motors are available in single and three phase models from 1/2 to 5 horsepower.

## Features

- Stainless steel shaft, nameplate and hardware
- Double sealed ball bearings
- Spring loaded contact seal on shaft end
- Corrosion resistant polypropylene fan and fan cover
- Baked on hybrid white powder paint provides durability
- Internal corrosion resistant coatings on stator and rotor
- Class F non-hygroscopic insulation with a 1.15 service factor
- Bolt-on, easily removable rigid base
