

EASA Accreditation

Dedicated People, Quality Products,
and Above All, Service.

All six L&S Electric service centers has earned EASA Accreditation for motor repair. L&S Electric is the first company in Wisconsin, Minnesota, and Michigan to earn accreditation, which assures efficiency and reliability of repaired motors.

It's been proven that by following defined good practices, electric motor efficiency can be maintained during repair and rewind. An international accreditation program has been created by the Electrical Apparatus Service Association (EASA) centered on good practices. The overall goal behind this program is to make sure service centers follow the program's guidelines to preserve the efficiency and reliability during electrical and mechanical repairs of electric motors. Three-phase, squirrel cage electric motors are the only type of motors that is applied to this program.

EASA Accreditation Program Categories

- Housekeeping
- Training
- Internal audits
- Identification and condition assessment
- Terminal leads, connectors, and boxes
- Cooling system
- Shafts
- Bearings (ball, roller, and sleeve)
- Lubrication
- Frame and bearing housing
- Squirrel cage rotors
- Balancing
- Accessories
- Winding removal and core integrity
- Rewind data specifications
- Stator windings, insulation system, conductors, and coils
- Winding impregnation
- Winding insulation and coil tests
- High-potential tests
- Bearing insulation
- No load tests
- Finish and handling
- Calibration

L&S Electric EASA Accredited Service Centers

- L&S Electric - Appleton
- L&S Electric - Menominee
- L&S Electric - Minneapolis
- L&S Electric - Sturtevant
- L&S Electric - Wausau North
- L&S Electric - Wausau South
